

# Summary Unit 5 – 4º Primaria

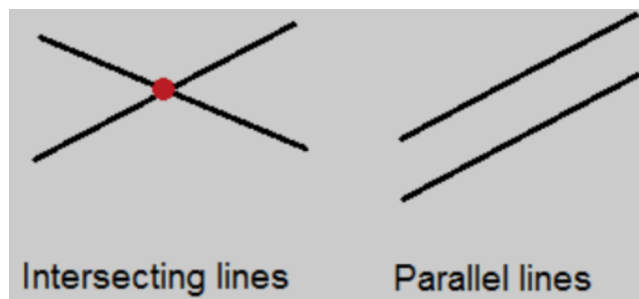

## Profiles

Profiles allow us to see the side or lateral view of the face or body of an animal or person.

## Straight Lines

Straight lines that never intersect are called *parallel lines*. If two or more straight lines intersect at a point, they are called *secant lines*.

## Repetition and Visual Rhythm

When shapes and elements are repeated in an orderly manner, they create a visual rhythm.

## Composition, Balance, and Proportion

- Composition refers to how artists arrange elements in a work of art. If elements are arranged similarly on both sides of a composition, the artist creates balance.
- Elements are proportional when they have a relative size.

## Community Art

This type of art aims to improve the lives of members of a community.
