

Summary Unit 4 – 4^o Primaria

Types of Light: Natural and Artificial

- Natural light comes from things in Nature that produce light.
- Artificial light comes from electrical energy.

Types of Sculpture

- Kinetic sculptures incorporate movement.
- Static sculptures do not incorporate movement.

Regular Polygons, Basic Geometric Forms, and Volume in Planes

- A polygon or geometric shape is regular when all its sides are the same length. Polygons create geometric forms.
- Planes are used to represent each side of a geometric form. This creates objects with three-dimensional volume.

Still Lives

Artists recreate everyday objects in still lifes, such as food, flowers, and containers. Artists have always used the still life genre to study light and composition, and we can find drawings, paintings, photographs, or even videos of this representation of inanimate objects.

Visual Poems as Communication Media

In Art, the sender is the artist and the receiver is the spectator. The communication media is the work of Art and the message is its meaning. A visual poem is a communication medium because of the images that appear in it.

If this were a poem, it would be about
wine. And it is shaped like a glass of
wine. Perhaps it is about a glass of
chardonnay or a cabernet or zin-
fandel. Or maybe it just cele-
brates the joy of wine.
